MATERIAL SAFETY DATA SHEET

Product Name: DCT AUTOMATIC DISHWASHER DETERGENT
MSDS Date: April 20, 2011
Revision No.: 08

SECTION 1  PRODUCT AND COMPANY IDENTIFICATION

PRODUCT

Product Name: DCT Automatic Dishwasher Detergent
Product ID Number: 130050
Product Description: Dishwasher Detergent

COMPANY IDENTIFICATION

Supplier: Diversified Chemical Technologies, Inc.
15477 Woodrow Wilson
Detroit, MI 48238
(313) 867-5444

Product Technical Information: (313) 867-5444

24 Hour Emergency Phone Number (Health & Safety; Transportation) CHEMTREC - (800) 424-9300

SECTION 2  COMPOSITION / INFORMATION ON INGREDIENTS

Hazardous Ingredients | CAS Number | OSHA PEL | ACGIH TLV | OTHER | % WT
---|---|---|---|---|---
Tetrapotassium diphosphate | 7320-34-5 | | | | 20 – 30
TS 1074 – Trade Secret | | 5 mg/m3 | | 1 – 10
TS 1068 – Trade Secret | | | | 1 – 5
Potassium hydroxide 45% | 1310-58-3 | 2 mg/m3 | 2 mg/m3 C | | 1 – 10

SECTION 3  HAZARDS IDENTIFICATION

****EMERGENCY OVERVIEW****

Harmful if swallowed.
Can be irritating to eyes, skin and/or respiratory tract if contact is frequent or prolonged.

PRIMARY ROUTES OF EXPOSURE

Eyes, Skin, Inhalation, Ingestion

TARGET ORGANS

Eyes, Skin, Respiratory System

POTENTIAL HEALTH EFFECTS

Acute Effects

<table>
<thead>
<tr>
<th>Route</th>
<th>Effect</th>
</tr>
</thead>
<tbody>
<tr>
<td>Inhalation</td>
<td>Can cause irritation to respiratory tract upon prolonged, repeated exposures.</td>
</tr>
<tr>
<td>Eye</td>
<td>Can cause irritation to eyes upon prolonged, repeated exposures.</td>
</tr>
<tr>
<td>Skin</td>
<td>Can cause irritation to skin upon prolonged, repeated exposures.</td>
</tr>
<tr>
<td>Ingestion</td>
<td>Harmful if swallowed.</td>
</tr>
</tbody>
</table>
SECTION 3  HAZARDS IDENTIFICATION  continued

Chronic Effects  Product has not been tested as a whole to determine its long-term effects. The product does contain ingredients that potentially may affect the following target organs as a result from repeated excessive exposures: Eyes, Skin

Carcinogenicity  None  IARC: N/AP  NTP: N/AP  OSHA: N/AP

Medical Conditions Aggravated by Long-Term Exposure  Possible pre-existing dermatitis; dry skin conditions

SECTION 4  FIRST AID MEASURES

INHALATION  Remove to fresh air. Rest in half-upright position. Get prompt medical attention if necessary.

EYE CONTACT  Remove contact lenses. Hold eyelids apart and flush eyes with plenty of water for at least 15 minutes. Get immediate medical attention if irritation persists.

SKIN CONTACT  Remove contaminated clothing. Flush skin with plenty of water for at least 15 minutes. Get immediate medical attention if irritation persists.

INGESTION  Do not induce vomiting. Wash out mouth with water and obtain medical attention. If conscious, milk or water to drink may be beneficial. Treat symptomatically. Get immediate medical attention. Never give anything by mouth to an unconscious person.

NOTES TO PHYSICIAN  Treat symptomatically. It is advisable not to induce vomiting due to the risk of aspiration and it is not usually necessary unless a large amount has been ingested or it has been contaminated with another product. Gastric lavage under supervised medical conditions can be carried out if necessary.

SECTION 5  FIRE FIGHTING MEASURES

Flash Point  none
Flash Point Method  PMCC
Auto Ignition Temperature  N/D
Flammable Limits  
  LEL  N/D
  UEL  N/D

Appropriate Extinguishing Media  Dry Chemical, Foam, CO2

Unusual Fire or Explosion Hazards  Contaminated water runoff may cause environmental damage. Dike and collect water used to fight fire.

Fire Fighting Instructions  Firefighters should wear self-contained breathing apparatus (SCBA) and protection for skin. Stay away from ends of containers during a fire; containers may explode due to pressure build-up inside if heated. Do not spray water directly into storage containers due to boil over danger. Water may be used to cool nearby containers and surfaces.

Hazardous Combustion Products  Irritating fumes, toxic gases and acrid smoke. Combustion can produce a variety of compounds including oxides of carbon; oxides of potassium; water vapor; unburned hydrocarbons; partially oxidized organic compounds and other unidentified organic and inorganic compounds.
SECTION 6  ACCIDENTAL RELEASE MEASURES

NOTIFICATION PROCEDURES  In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations. National Response Center [24-HR Reporting (800) 424-8802]

GENERAL  Stop leak if you can do so without risk. Contain spillage and prevent entry into sewer drains and watercourses. Retain all contaminated water for removal and treatment.

SAFETY PRECAUTIONS  Use suitable protective clothing appropriate to spill size and risk of exposure. Refer to Section 8 for further details. Use extreme caution because affected area(s) may be slippery. For industrial use only. Keep out of reach of children.

SPILL OR LEAK PROCEDURES  Neutralize spilled material with weak solution of citric acid if possible. Confine spillage and absorb spilled material with noncombustible, inert absorbent such as sand, clay, or vermiculite and place into DOT-approved containers for later disposal.

SECTION 7  HANDLING AND STORAGE

HANDLING  Avoid contact with skin, eyes, and clothing. Wear suitable protective equipment (see Section 8). Avoid breathing mist or vapor – use only in a well-ventilated area. Unvented containers may develop pressure – use with caution. Wash skin thoroughly after handling. Eyewash stations and safety showers should be easily accessible to area where product is used.

Loading/Unloading Temperature  [Ambient]
Transport Temperature  [Ambient]
Transport Pressure  [Ambient]
Static Accumulator  N/D

STORAGE  Store in dry conditions protected from frost and elevated temperatures – covered storage is recommended. Keep containers closed when not in use. Store away from incompatible materials (see Section 10). Long-term storage temperatures should not exceed 120° F. Keep away from sparks, heat and flame. Do not store in reactive metal containers (i.e. aluminum, tin, zinc, galvanized steel or their alloys)

SECTION 8  EXPOSURE CONTROLS / PERSONAL PROTECTION

ENGINEERING CONTROLS  The level of ventilation necessary will vary depending upon potential exposure conditions. Control measures to consider:

Ventilation  Adequate ventilation should be provided so that exposure limits are not exceeded (see Section 2 for exposure limits. If heavy misting is present, local exhaust ventilation should be considered in addition to general mechanical ventilation.
ADMINISTRATIVE CONTROLS
The level of protection necessary will vary depending upon potential exposure conditions. Control measures to consider:

PERSONAL PROTECTIVE EQUIPMENT
Personal protective equipment selections vary based on potential exposure conditions such as applications, handling practices, concentration and ventilation. Information on the selection of protective equipment for use with this material, as provided below, is based upon intended, normal use.

Respiratory Protection
If vapors or mists are present and if engineering controls do not maintain airborne contaminant concentrations at a level which is adequate to protect worker health, a NIOSH/MSHA approved respirator may be appropriate. Respirator selection, use and maintenance must be in accordance with regulatory requirements, if applicable. Types of respirators to be considered for this material include: Air-Purifying Half-Face Respirator with Organic Vapor/Mists Cartridges

Hand Protection
Any specific glove information provided is based on published literature and glove manufacturer data. Glove suitability and breakthrough time will differ depending on the specific use conditions. Contact the glove manufacturer for specific advice on glove selection and breakthrough times for your use conditions. Inspect and replace worn or damaged gloves. The types of gloves to be considered for this material include: Chemical-resistant Neoprene or PVC

Eye Protection
If contact is likely, safety goggles are recommended. If splashing is likely, safety goggles with splash shield are recommended

Skin and Body Protection
Any specific clothing information provided is based on published literature or manufacturer data. The types of clothing to be considered for this material include: Long-sleeved shirt, pants and chemical-resistant apron at a minimum. If prolonged or repeated contact is likely, chemical-resistant clothing including boots are recommended.

Other Protective Equipment
Emergency eyewash/safety shower in the immediate area

Specific Hygiene Measures
Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing separate from home laundry and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping. Do not store work clothing and protective equipment in the same locker as personal clothing.

SECTION 9
PHYSICAL AND CHEMICAL PROPERTIES

<table>

Evaporation Rate (water = 1)  N/AV
Volatile Organic Compounds (%)  N/D
Solubility  Complete
Viscosity (cps)  N/D

SECTION 10  STABILITY / REACTIVITY

Chemical Stability
Material is stable and unlikely to react in a hazardous manner during recommended storage conditions and normal conditions of use.

Conditions to Avoid  Extreme temperatures
Reactivity / Incompatibility  Strong oxidizing agents, strong acids, light reactive metals (aluminum, zinc, tin, galvanized steel, and their alloys)

Hazardous Decomposition
Material does not decompose at ambient temperature. Thermal decomposition can produce a variety of compounds, the nature of which will largely depend on the conditions bringing about decomposition. Incomplete combustion or thermal decomposition may be expected to generate such materials as: acrid smoke and irritating fumes; particulate matter and unburned, hydrocarbons; oxides of carbon; oxides of potassium; water vapor; oxidized organic compounds; and other unidentified organic and inorganic compounds.

Hazardous Polymerization  Will not occur.

SECTION 11  TOXICOLOGICAL INFORMATION

Product Toxicological Data

SECTION 12  ECOLOGICAL INFORMATION

Product Ecological Information  N/AV
Ingredient Ecological Information  N/AV

SECTION 13  DISPOSAL CONSIDERATIONS

EPA Waste ID Number
Take pH of wastewater solution to determine whether waste material is RCRA-hazardous (D002) or not. Waste product is RCRA-hazardous (D002) if pH is > 12.5. However, if this product is altered, it is the responsibility of the user to determine whether the material meets the criteria for hazardous waste at the time of disposal.

Waste Disposal
Neutralization/wastewater treatment is preferred method of disposal. Dispose of contaminated water in a contained waste treatment system. Follow all applicable federal, state, local and provincial regulations. It is the end-user’s responsibility to determine the regulatory status of waste at the time of disposal.

Empty Containers
Empty containers may still contain RCRA-regulated residuals; therefore, clean empty containers of any residue per 40CFR261.7 guidelines and either recycle containers or dispose of in normal trash.

SECTION 14  TRANSPORT INFORMATION

LAND (DOT)
DOT Proper Shipping Name  None Required (Not DOT-Regulated per Corrositex Test No. 15428 dated 06/25/07)
